

FAST, AFFORDABLE INTERNET FOR SCHOOLS

Double Your Current Broadband Speed for \$187 a Month*

"Everyone is happy, no one more so than myself. Before this bonding technology there was no other option that was within budget: SHDSL was too expensive and slower; fibre was well out of range; and wireless options were slow and well out of budget as well."

Andrew Warfield
ICT Manager and Systems Administrator
Nowra Anglican College

Overview

Teaching and learning success in this digital age is dependent on fast, available and responsive broadband. If your school is struggling to achieve this due to limited availability of options, lack of infrastructure or affordability of available services, Fusion Broadband has a solution that will allow you to have high speed Internet for your students, administration staff and students right now! Why wait for the NBN?

Your Current Internet Service

A lot of schools across Australia have a choice when it comes to configuring a fast Internet connection; fibre, cable, and Ethernet over copper to name a few. Whilst these services are fast, they come at a cost - a high cost. Many other schools have fewer options and are limited to a single ADSL service to support many hundreds of students. Whilst it is cheap, ADSL is frustratingly slow and limits what teaching staff can offer their students simply because of lack of bandwidth. It is this cheap ADSL service that many schools are restricted to, simply because of cost of other services. Fusion Broadband has a solution for you.

Use your existing ADSL service to multiply your bandwidth

Fusion Broadband Bonded Internet utilises your current ADSL service with new ADSL services to multiply your Internet bandwidth. We call it Broadband Bonding. Think of it like lanes on a freeway...if you need to move more traffic, simply add more lanes!

If you have a single ADSL service now, we can double your speed for only \$187 per month* by simply adding a second ADSL service!

If you need even more speed, we can add even more ADSL services.

10 reasons to consider Bonded Internet

- Fusion Broadband Bonded Internet is available now. No need to wait for the NBN for high speed Internet.
- Installation is quick and seamless and can be completed in only a matter of days from ordering.
- Bonded Internet is available over the entire DSL foot print in Australia. If you have ADSL, you can use our broadband bonding system.
- Bonded Internet is transparent to all traffic protocols with a single TCP flow and a single static IP address.
- Minimal Capital Expenditure required.
Talk to us about how to reduce your setup costs to \$0.
- Low cost: For as little as \$580 a month (including their ISP costs) one of our customers increased their Internet speed by as much as six times.
- Add extra lines as required to cater for your growing school.
- Seamlessly combine any number of ISPs that you choose.
- Choose several ISPs to ensure uninterrupted service should one ISP dropout.
- Giving your teachers the tools and access to services increases teacher satisfaction and ultimately, student's productivity.

*not including the additional ISP charges
